

RECENT WORK HISTORY

- February 2015 to Current **ESC Automation - Graphics Technician**
 Working in collaboration with application engineers, I build the front end for HVAC monitoring systems. Complex system drawings are dissected to create user friendly visualizations. Information architecture and visual guidelines are used to develop a clean and organized UI.
- November 2014 to January 2015 **Staples Canada - Copy and Print Associate**
 Orders are taken from clients in person or online. Organizational and multitasking skills are used to talk to customers and fill orders simultaneously. Technical and troubleshooting skills are used to format files and prepare them for print and finishing.
- April 2014 to June 2014 **Freelance Web Design** <http://www.michiganofficemaintenance.com/>
 Working from home as an independant consultant, designer, and developer for the online needs of small businesses. Provided feedback and advice about creating a web presence and the needs for a simple, small business website based on the goals of the organization. Developed the visual design and HTML/CSS/PHP for the website.
- August 2011 to April 2012 **Simon Fraser University - Communication Assistant**
 Worked as an independent designer and tech assistant to the International Student Services department. Utilized graphic design and communication skills to create marketing material for the department's programs. Managed the transfer of the website to be moved to a new content provider.
