Totals

Lighting
1820 kW

Mechanical
2200 kW

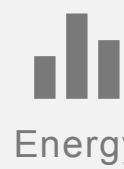

Heat/Cool
1320 kW

Date selection/info summary. Avg consumption gauge uses a limit of approx highest consumption the building is seen using (unless another comparison model can be determined). Green % comparator turns red if % is in the positives.

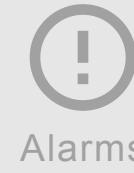

Chart changes based on date selected. Date picker can be configured to select a week/month range if requested. Totals can be configured to sum different groups of information.
